# Legal Disclaimer

It is required that you read this legal disclaimer section carefully. If you have any doubts, get advice from legal, financial, taxation, or other competent law practitioners. All of the information provided here is not intended to be complete, and it should never be construed as a part of different contractual arrangements.

It is our firm conviction that the information provided in this white paper is accurate and up to date and that all products, services, technical architecture, token distribution, and company timelines are accurate and up to date. Furthermore, all of these materials may have changed without notice, and they can never be considered a signatory agreement of advice.

This white paper does not obligate anybody to sign a contract or make a legally enforceable commitment to contribute. This white paper also does not constitute any form or part of any opinion that can be construed as advice, or that can be used to sell or solicit any offer by Trillions to purchase our token, nor shall it be construed as a part of any effect that can be used in the formation of a contract or an investment decision. Compliance with tax obligations:

Users of the Website are entirely responsible for determining what, if any, taxes, if any, apply to their transactions. The Website's owners or authors are not responsible for determining which taxes apply to transactions.

NFT ART Token shall not be held liable for any loss or harm resulting from the use of this website's material, including written material, links to third-party sites, data, quotations, charts, and buy/sell signals. Please be fully informed about the dangers and expenses of trading assets on the financial markets (digital or otherwise). ICOs, in particular, are one of the riskiest investing options. There's a chance you'll lose your whole investment.

Trading cryptocurrencies have a high level of risk and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

# Accredited Investors

Although the material contained in this white paper was prepared for accredited investors based on information from public and private sources that PYROCHILL SOLUTIONS, INC. ("company") believes to be reliable, no representation, warranty or undertaking, stated or implied, is given as to the accuracy of the information contained herein, and the company expressly disclaims any liability for the accuracy and completeness of information contained in this white paper.

This white paper is distributed for general informational and educational purposes only and is not intended to constitute legal, tax, accounting or investment advice. The information, opinions and views contained herein have not been tailored to the investment objectives of any one individual, are current only as of the date hereof and may be subject to change at any time without prior notice.

The company does not have any obligation to provide revised opinions in the event of changed circumstances. All investment strategies and investments involve risk of loss. Nothing contained herein should be construed as investment advice. Any reference to an investment's past or potential performance is not, and should not be construed as, a recommendation or as a guarantee of any specific outcome or profit.

The information contained herein is not, and shall not constitute an offer to sell, a solicitation of an offer to buy or an offer to purchase any securities, nor should it be deemed to be an offer, or a solicitation of an offer, to purchase or sell any investment product or service.

Any ideas or strategies discussed herein should not be undertaken by any individual without prior consultation with a financial professional for the purpose of assessing whether the ideas or strategies that are discussed are suitable to you based on your own personal financial objectives, needs and risk tolerance.

# Who Are We?

PYROCHILL Solutions, Inc. ("company") is a Colorado based corporation and is the creator of "PYROCHILL" a non-toxic, biodegradable fire inhibitor and fire extinguishing compound. Unlike any other fire retarding products most of which are highly toxic and merely delays the amount of time before something catches on fire, any PYROCHILL treated material will never catch on fire.

Every year there are 46,000,000 acres of forest lands ravaged by wildfire. There are 15 billion trees harvested and destroyed by fire each year, and there are 684,000 deaths attributed to fire. Our goal is simple...

- Plant two trees for every tree harvested or destroyed by fire.
- Recycle every last ounce of discarded paper into reusable products which would limit the number of trees harvested per year.
- Better forest management to prevent wildfires.
- Save lives by educating the masses about PYROCHILL Fire Inhibitor and PYROCHILL fire safety Products. <http://www.pyrochill.today>

It is the heartfelt goal of the company to save lives through the introduction of its life saving products, PYROCHILL, the PYROCHILL SNUFF BOMB, and the PYROCHILL PORTABLE FIRE ANCILLARY UNIT. To assist the company in its fight for fire safety, fire awareness, and the branding of PYROCHILL related products.

In November of 2021, the company applied and was approved by the United States government to list all of the PYROCHILL related products and services on the the federal governments System for Awards Management . This will allow our marketing department greater flexibility in contracting with numerous government entities such as the United States Forestry Service, NASA, Department of Defense, Department of Agriculture, BLM, FEMA, and more.

# PYROCHILL PYROCOIN

PYROCHILL PYROCOIN (token symbol "PCPC") created by PYROCHILL Solutions, Inc., a Colorado based corporation (the "company") is a BEP 20 token built on the Binance Smart Chain (BSC), having features of transparency, physical rewards, and token rewards. In the crypto market, the developers of PCPC realized several problems that needed to be addressed head-on before the birth of PCPC. There existed a huge lack of transparency in today's cryptocurrency marketplace.

Yet, for a technology that enhances transparency across multiple sectors, cryptocurrencies, which are built around the very same technology, continue to instill a lack of trust and transparency. It can be hard for investors to trust cryptocurrencies due their decentralised nature, meaning no government body, bank or authority has control over it.

So, that being said...the company agreed unanimously to be transparent in every possible way.

- **PCPC Transparency:** On March 2, 2022 PCPC filed a form REG D 504 with the United States Securities & Exchange Commission. In addition, token holders will have the same rights as a common stock shareholder in a publicly traded company including, but not limited to "coin holder zoom meetings," PCPC team access, and membership in PYROCHILL Plantit Earth.

<https://www.sec.gov/edgar/browse/?CIK=1913903>

- **Physical Rewards:** Token holders will receive PYROCHILL products and service rewards.
- **Token Rewards:** Token rewards will be distributed to the token holders semi-annually as established by the PCPC bylaws.

# Our Mission

Every year there are 46,000,000 acres of forest lands ravaged by wildfire. There are 15 billion trees harvested and destroyed by fire each year, and there are 684,000 deaths attributed to fire each year. Our goal is simple :

- Plant two trees for every one tree harvested or destroyed by fire.
- Recycle every last ounce of discarded paper into reusable products which would limit the number of trees harvested every year by building PYROCHILL Cellulose Recycling plants at every landfill in the world.
- Achieve better forest management to prevent wildfires by utilizing PYROCHILL in the prevention of wildfires by creating PYROCHILL fire breaks.
- Achieve worldwide utilization of PYROCHILL to fireproof homes and its contents, outdoor decking, fencing, automobiles, boats, RVs, camping gear, military camouflage uniforms, and basically any porous material that may be prone to fire.

# Our Vision

Our vision is to create a fire safeworld and to ensure that our children and our children's children live in an ecologically sound and tree filled world. How do we achieve this?

Last year 11.5 billion trees were harvested to produce daily newspapers, writing paper, wrapping paper, packaging paper, lumber, building supplies, telephone poles, railroad ties, etc., etc. PYROCHILL PLANTIT EARTH is a green earth supported society who's main quest is very simple...

Last year 11.5 billion trees were harvested to produce daily newspapers, writing paper, wrapping paper, packaging paper, lumber, etc., etc. PYROCHILL PLANTIT EARTH is a green earth supported society who's main quest is very simple. For every one tree harvested or destroyed, plant two trees to take its place. And, recycle every bit of paper that ends up in landfills into reusable products like PYROCHILL fireproof cellulose insulation, PYROCHILL mulching compound, paper goods, and building materials. This means that we use our best foot forward in placing PYROCHILL paper recycling plants at every landfill in the world.

# What is HODL

FYI...

HODL, "holding," simply put, is the process of securing cryptocurrencies to obtain incentives. To maximize the rewards, investors can hold their cryptocurrency by validating and holding their tokens. The more the investors hold on to the tokens, the more they will be rewarded.

The term HODL is somewhat of a joke/meme and has been since it started. First off, it was written by a drunk trader at the onset of the bear market.

Second off, logically speaking, while HODLing through a temporary short term correction is often a solid play, and HODLing on the way up during a bull market can be a great move. HODLing everything through an extended bear market is hardly ever an ideal move.

The ideal move in a downtrend is to sell at least part of your stack once the longer term technical indicators clearly point toward a downtrend, and then buy again when the trend reverses.

Likewise, not taking any profit at an all-time-high (for example a high that has been tested twice and failed), is generally not an ideal move.

That said, the post itself covers the above in many ways. The post eludes to the idea that while the "ideal" move might be to sell when the tides turn against us and then to buy back in when things are looking cheery again, those who don't, don't trust themselves to, or won't can always "just HODL" and "buy the dips" in hopes of future rewards.

The bottomline being, and as GameKyuubi, the commenter who originated the meme, points out, HODL can end up being a solid long term strategy for those who know they aren't pro traders who can make those ideal short term moves.

# Scalability

In the Blockchain world, scalability is a concept that is often used. It refers to a computational process's potential to be used or generated in a variability of ways. Proof of stake protocols, as shown by PCPC's higher transaction outputs and lower fees, make for greater scalability.

## **Echo Friendlier:**

As Proof of stake blockchains are less energy consumers, they are more environment friendly. Thus, they have a lower carbon footprint and have little or no environmental effects.

## **Highly Secured with the help of Smart Contract:**

The biggest issue in the modern world is security and privacy, and We provides a swift and stable portal that is backed by the pyrocoin contract, making him superior to others. Pyrochill pyrocoin contract is offering a highly secure and fast platform to the users for staking crypto.

# Pancake Swap

PCPC is listed on the trading site known as Pancakeswap.

<http://www.pancakeswap.finance>

<http://www.coinalpha.app>

# PYROCHILL Ecosystem

Home fires and Wildfires are a part of nature. They both play a key role in shaping ecosystems by serving as an agent of renewal and change. But fire can be deadly, destroying homes, wildlife habitat and timber, and polluting the air with emissions harmful to human health.

Fire also releases carbon dioxide—a key greenhouse gas—into the atmosphere. Fire's effect on the landscape may be long-lasting. Fire effects are influenced by forest conditions before the fire and management action taken or not taken after the fire.

It is often described by the type of fire, mean and variance in fire frequency, intensity, severity, season, pattern, and a real extent of a burn. Types of fire include ground fires that burn the organic layers of the soil, surface fires that burn just above the ground, crown fires that burn in the canopies of trees, and mixed fire regimes where fires vary in severity with both surface and crown fire patches.

Changes from fire-resistant to flammable ecosystems may also be rapid. In the Brazilian Amazon, fires in closed-canopy forests spread as a "thin, slowly creeping ribbon of flames a few tens of centimeters in height." Despite the low severity of an initial fire, burning causes structural changes, opens up the forest canopy, dries out the understory and contributes to an increase in flammable understory biomass, increasing the risk of a second fire. Weedy vines and grasses quickly colonize twice-burned forests, further adding to the flammable biomass. Positive feedback of this kind is estimated to reduce a forest to scrubby vegetation resembling recently abandoned farmland in 20–30 years.

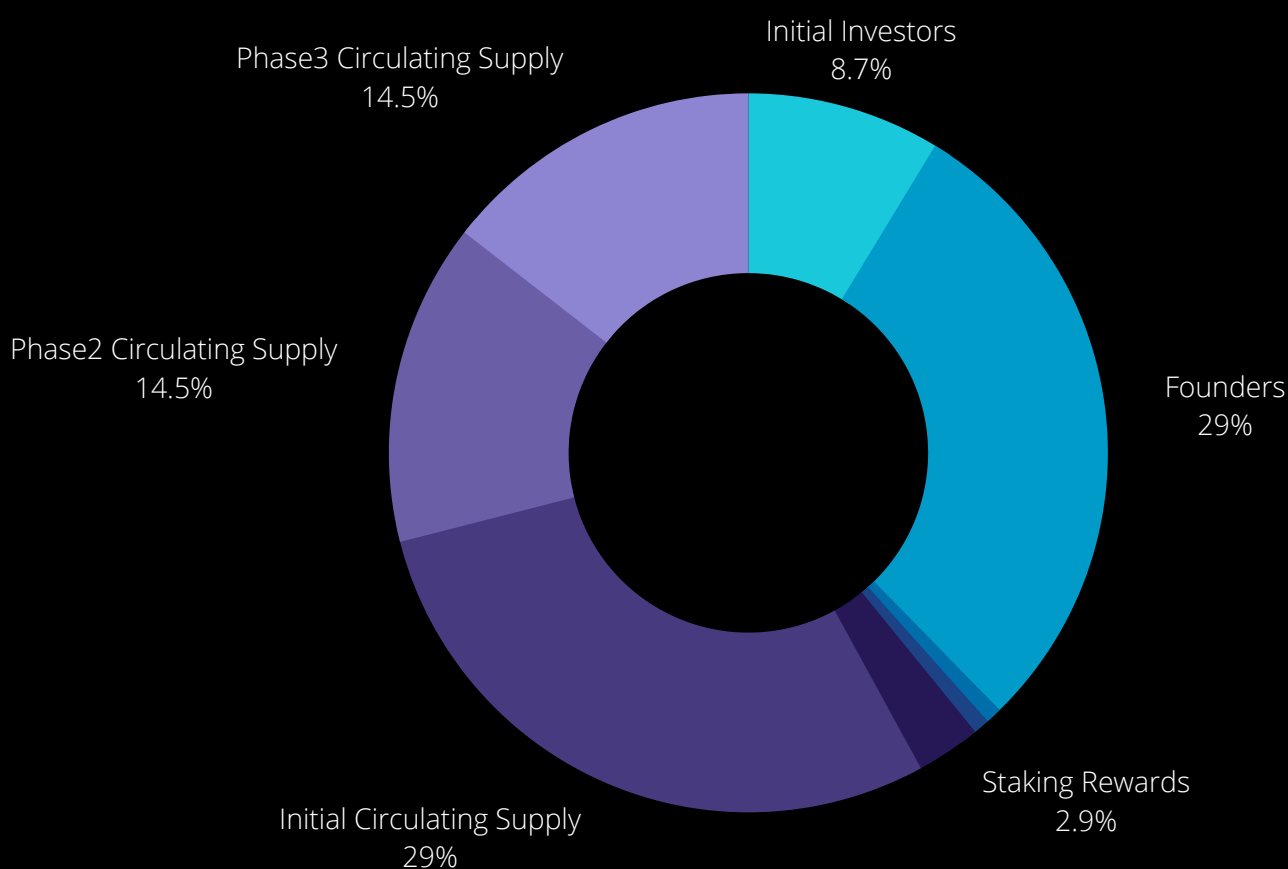

# Challenges We've Overcome

## **COMPLETE TRANSPARENCY**

There are more than 6800 cryptocurrencies in the market with their Blockchain technologies. A great deal of them are scams and the creators are untracable. PYRCHILL PYROCOIN is located at a brick and mortar office, is associated with a company listed with the federal government's SAM, and filed with the Securities & Exchange Commission on for REG D 504, has an ein #, Dunn and Bradstreet #, cik code, and all the trimmings of a transparent company.

Our team can be contacted by phone during normal business hours (eastern standard time) or send us an email.

# Tokenomics

# Road Map

2022

February 1, 2022

Create PCPC (Completed)

March 1, 2022

File form REG D 504 with the United States Securities & Exchange Commission (Completed).

February 13, 2022

List PCPC on Pancakeswap (Completed).

March 13, 2022

Partner with launchbytes (Completed).

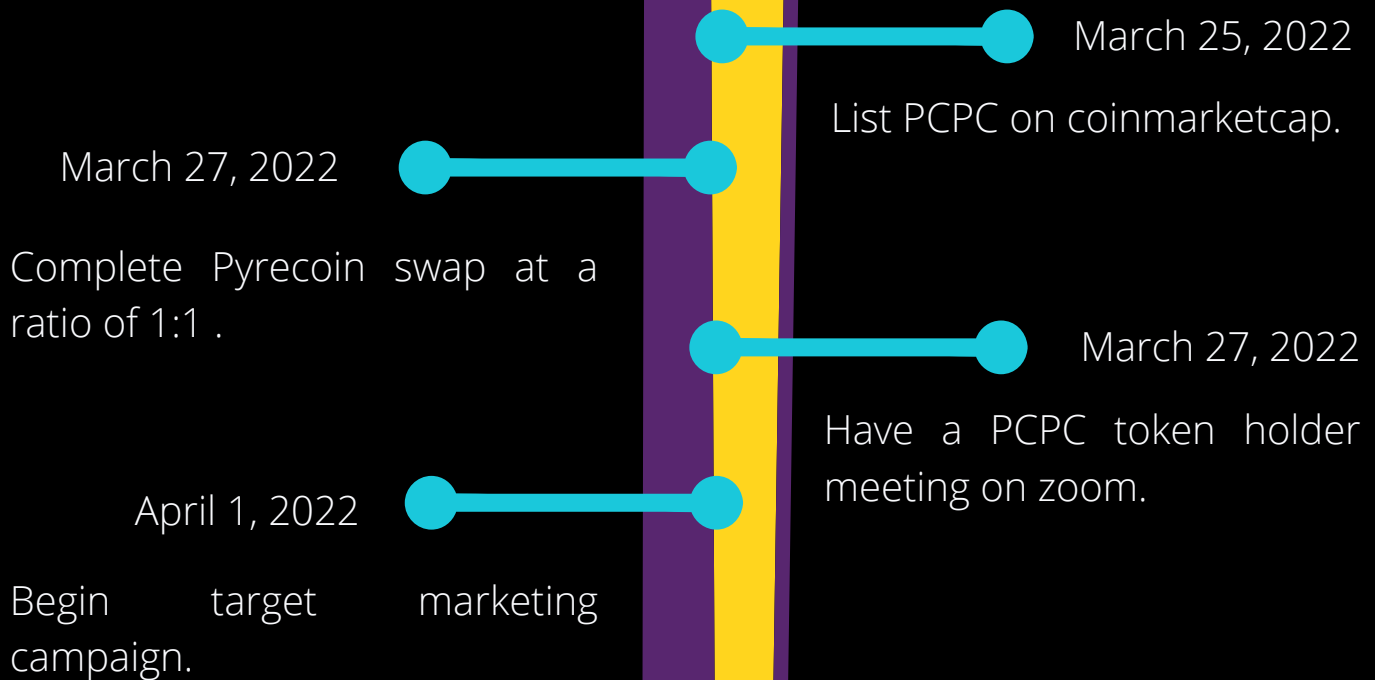

March 20, 2022

Notify Pyrecoin holders of upcoming exchange (swap) of PYRECOIN tokens for PCPC.

# Road Map

**ROADMAP**

# Our Team

**H.T. LANGRILL**

H. T. Langrill is the inventor of the corporate proprietary formulation known as PYROCHILL, and has been involved in several IPO's in his life of 60 plus years. He is also a certified "Fire Safety Specialist" and has years of experience in gathering data on the dangerous effects of fire to the world's ecosystem.

**AARON MOGUEL**

Aaron Moguel is a beneficial owner of PYROCHILL and is an executive director of PYROCHILL Solutions, Inc. Mr. Moguel brings years of business experience and management capabilities in the company's quest for growth and investor relations.

**CARL BURTON**

As you can see from his LinkedIn photo... Carl is an experienced miner (lol) and comedian at heart. He is also an accomplished author and the director of sales and marketing at PYROCHILL Solutions, Inc. with an emphasis on fire safety and fire awareness.

# Our Team

## MICHAEL HANLON

As you can see from his LinkedIn photo... Carl is an experienced miner (lol) and comedian at heart. He is also an accomplished author and the director of sales and marketing at PYROCHILL Solutions, Inc. with an emphasis on fire safety and fire awareness.

## RACHAEL "KAI LEA" LANGRILL

Rachael Langrill has been working alongside her father for years and is destined to become the future leader of PYROCHILL Solutions, Inc. But, for now... she is content on being an executive director of the company and assists with the customer service operations of the company.
